

BRIZO[®]

LOOKBOOK

2014-2015

FASHION ISN'T JUST ABOUT CLOTHES.

IT'S ABOUT CREATING A LOOK. EVOKING A FEELING.
FINDING AN AESTHETIC THAT SHAKES PEOPLE TO THEIR CORE.
THAT CHANGES MINDS, MOODS AND BEHAVIOR.

FASHION CAN BE PROVOCATIVE.
PLAYFUL. APPROACHABLE. ALOOF.
IT CAN BE ALL OF THOSE THINGS AT ONCE.

THE ONE THING IT ISN'T IS PREDICTABLE.

FASHION IS ABOUT CREATING THE VERSION OF OURSELVES
WE WANT TO BE. AND THEN OWNING IT.

FASHION IS MORE THAN WHAT WE WEAR. IT'S WHO WE ARE.

FASHION INSPIRES US.

AND IT'S REFLECTED IN EVERYTHING WE CRAFT, EVERY SPACE
WE INHABIT, EVERY VISION WE BRING TO LIFE.

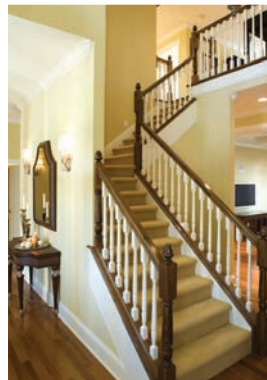

FASHION IS BRIZO.[®] AND BRIZO IS FASHION.

STYLE-CONTINUUM

- CLASSIC
- TRENDY
- FESTIVE
- RESTRAINED
- ORGANIC
- INDUSTRIAL
- RESPECTFUL
- REBELLIOUS

However you see your perfect kitchen or bath, there's a Brizo® collection that will match—and enhance—your vision. Start your search by identifying the look you desire on our style continuum; on the next page, all Brizo collections are arranged on that continuum, from stately to modern.

There are no wrong answers when you're designing your dream. So open your eyes—and your mind—and follow your inspiration wherever it may lead.

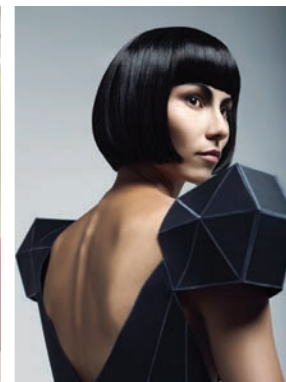

STATELY

The stately style draws inspiration from classical design periods to create an authentic, heavily ornate space. Natural materials, including marble and limestone, combine with woods in deep, rich tones, such as mahogany, to ground the style with a sense of history.

TRADITIONAL

The traditional style taps into a sense of heritage and longevity, creating a comfortable, broken-in look reflective of years of use. Dark wood tones pair with matte and distressed finishes to create an aesthetic that's formal and decorative in nature, while still retaining a warm, handcrafted feel.

CASUAL

The casual style is all about timeless design. Traditional, historic or vintage styles are given a fresh look with clean lines that defy aging. A de-emphasis of decoration and ornamentation keeps the focus on the simple sophistication of the design, and creates a comfortable, relaxed atmosphere.

CONTEMPORARY

Minimalist and streamlined, the contemporary style seeks to create feelings of simplicity, harmony and balance. Clean lines and simple designs pair with sleek, streamlined hardware in stainless steel, polished nickel or chrome finishes. Light-grained woods and stone bring warmth to the space.

MODERN

Simplicity is at the heart of what it means to be modern. Objects and spaces feature crisp, clean, minimalist lines with a decidedly geometric bent. Edges are more defined; everything is stripped down to its essence. Ultimately, the modern style is a celebration of the beauty to be found in man-made objects.

PROGRESS HAS NEVER LOOKED BETTER.

Brizo® has always believed in the power of innovation. Innovation is what drives technological advancement, leading to quantum leaps forward in functionality and durability. It is also at the core of what it means to be fashionable, where anticipating—and creating—trends is critical to success.

Here are just a few examples of our commitment to forward thinking in the kitchen. These technologies are more than just objects of desire, they're evidence of our desire to never stand still.

SmartTouch® Technology

Brizo's first-to-market technology allows you to activate the water flow with a simple touch to the faucet body, spout or handle. The touch-sensitive faucet can keep water at a constant temperature and pressure from use to use. This unique functionality makes it easy to activate the water flow only when needed, helping to reduce water usage. Its flexible operation also promotes safe food handling and efficiency of motion during prep work and clean up.

MagneDock® Technology

The first technology of its kind available, MagneDock features a patented, state-of-the-art magnetic docking system. This system securely holds the spray wand in place when not in use. The durable magnets are made to last forever, while their polarity keeps the spray head perfectly aligned, for a clean, seamless look that maintains the faucet's distinctive form.

DIAMOND Seal® Technology

Our DIAMOND Seal Technology uses a diamond-coated valve to bring you a faucet built to last up to 5 million uses. With its durable components and simple construction, a DIAMOND Seal Technology valve lasts up to 10 times longer than the industry standard (based on ASME 112.18.1 of up to 500,000 cycles).

2-Button, 4-Function Spray Wand

Another example of Brizo leadership through innovation, this feature provides users with exceptional control of their faucet's water flow. Alternate between stream and spray, control the water's volume in spray or stream mode, and even pause and restart the flow—all with two-button simplicity. For both cooking and clean-up, take control of your water like never before.

INTELLIGENCE MADE INDULGENT.

Brizo® remains committed to continually advancing the art and science of water in everything we do, merging distinctive design with extraordinary thinking to give our users the ultimate end experience. We're committed to not only using innovations today, but to paving the way for discovering innovations for tomorrow.

It's innovation, inspired.

H₂Okinetic® Technology

H₂Okinetic Technology is the study of water in motion, and Brizo Custom Shower Systems were the first to bring this revolutionary technology to market. By controlling water's shape, velocity and thermal dynamics, we've reinvented the showering experience—creating a warmer, more luxurious spray that blankets the body, giving the feeling of a high-flow spray with a fraction of the water.

SmartTouch^{Plus}™ Technology

The next generation of Brizo's revolutionary SmartTouch Technology, SmartTouch^{Plus} adds proximity sensing to our existing touch technology, allowing for both hands-free and touch-sensitive operation. It's a whole new level of control—and convenience.

TempIQ™ Temperature Control Technology

TempIQ Temperature Control Technology senses the water temperature before it leaves the spout. An LED light changes color to let you know exactly when water has reached your desired temperature. It has the ability to maintain a consistent water temperature with no sudden (and unwelcome) increases or decreases, while the true high-temperature limit stop offers an added degree of safety.

SUSTAINABLE LUXURY.

Brizo® products not only offer superior form and function, they're also designed with sustainability in mind. We believe strongly in being good citizens of our community, as well as good stewards of the planet. Because for us, it's not just about the products we make—it's about the mark we make on the world.

Brizo, as part of Delta Faucet Company, is proud to be named the 2013 WaterSense Partner of the Year by the U.S. Environmental Protection Agency (EPA) in recognition of its ongoing commitment to promoting advancements in water efficiency. The WaterSense program, a partnership program by the EPA, aims to protect the future of the U.S. water supply by providing people with easy and identifiable ways to conserve water. In addition, the program helps consumers make smart water choices in order to maintain high environmental standards and save money without compromising performance. Launched in 2008, the WaterSense Partner of the Year awards recognize partners that help advance the overall mission of the WaterSense program, demonstrate overall excellence in the water-efficiency arena and increase awareness of the WaterSense brand in a measurable way.

WaterSense® Labeled

As a WaterSense partner, the Brizo brand is committed to working with the Environmental Protection Agency (EPA) to encourage efficient use of water resources and actively protect the future of our nation's water supply. WaterSense is a special certification given to faucets that meet the water efficiency requirements set forth by the EPA, with a flow rate of 1.5 gallons per minute (gpm) for lavatory faucets and 2.0 gpm for showerheads/handshowers (versus Industry Standard ASME A112.18.1/CSA B125.1 of 2.2 gpm for lavs and 2.5 gpm for showerheads/handshowers). WaterSense labeled products use about 20% less water and perform as well or better than their less efficient counterparts.

Water Efficient

Our Water Droplet icon designates water efficient products that meet CALGreen standards.

Kitchen Faucets: 1.8 gpm @ 60 psi flow rate versus Industry Standard ASME A112.18.1/CSA B125.1 of 2.2 gpm.

Bath Faucets: 1.5 gpm @ 60 psi flow rate versus Industry Standard ASME A112.18.1/CSA B125.1 of 2.2 gpm.

Showerheads/Handshowers: 2.0 gpm @ 80 psi flow rate versus Industry Standard ASME A112.18.1/CSA B125.1 of 2.5 gpm.

Compliant with State and Federal Drinking Water Legislation

AB 1953 — California Health and Safety Code 116875 (AB 1953) was approved in California on September 30, 2006 in an attempt to reduce the amount of lead in drinking water. It was superseded on January 4, 2011 by the Reduction of Lead in Drinking Water Act. Known as the “Get the Lead Out” bill, this legislation (S. 3874) specifies that the weighted average lead content of pipes, fittings and fixtures used to convey drinking water cannot exceed 0.25% on wetted surfaces. (The previous national lead-free standard was 8.0%) Products with this check mark designation meet these standards.

JASON WU

for BRIZO®

In 2006, Brizo began sponsoring fashion shows of a young, relatively unknown NYC designer. His name was Jason Wu.

Since then, Jason's brand has grown on a seemingly exponential upward curve that has led him to designing gowns for influential women such as First Lady Michelle Obama, Reese Witherspoon, Julianne Moore, Diane Kruger and Kerry Washington, among others.

Over the years, the partnership and shared aesthetic between Jason and Brizo has also grown and matured—culminating in the creation of the *Jason Wu for Brizo™* line.

View the *Jason Wu for Brizo* collection | Page 56.

ONE-*on*-ONE WITH JASON WU

Q: How important is collaboration to your work?

JW: I love collaborating with interior designers and just collaborating in general. I think in the design community we all sort of draw inspiration from each other. For example, when I came to Brizo it was the first time I realized that fashion can be an inspiration for faucets—which was sort of unexpected for me.

Q: What's the biggest challenge you face in the design industry?

JW: As a designer you always worry, because you want people to love what you do. But I think the really important thing about creativity and the creative vision is that having a vision means not being afraid of what people might think of it. That's when I think an idea is clearest, when it's expressed without fear.

Q: Where do you find inspiration?

JW: For me, New York has a lot of energy and a lot of diversity. Right now, American style has become an inspiration for me and for designers all over the world—I see designers pulling from its sportswear roots and the relaxed attitude of the style—it's all about relaxed silhouettes.

Q: What is your process like once you are inspired by something?

JW: For me mood boards serve as a bit of a scrapbook. Once I see something I like I get an image of it and I put it on the board and eventually it starts telling a story of its own which is interesting. That's really how collections are born.

Q: What's the most challenging color for you to work with?

JW: The most challenging color to me is yellow because no one else seems to like it as much as I do. I always think it's such a great color, but it's difficult for some people to wear. I've just always been so partial to it.

Q: What part of the *Jason Wu for Brizo* collection makes you most proud?

JW: My favorite piece of the collection is the electronic faucet itself. I always call it the "little black dress" of faucets. I love that it's not so obvious that a fashion designer helped create it, but at the same time it has the idea of silhouette and the idea of modernity within a beautifully shaped object. And its matte black finish feels really modern to me.

Q: How do you regroup and re-energize yourself after every season?

JW: Each season tends to differ from one another even though they are ultimately alike. It's kind of like writing a novel where it's one chapter after the next—they really build on each other. Being able to evolve season after season is really important to me because it keeps me inspired and it keeps me motivated.

Q: What's the biggest piece of advice you have for young designers today?

JW: Take things one step at a time. Evaluate your aesthetic and be clear about who you are. Your design should say something. It should occupy a space where it means something. The best way to make that happen is to make your work personal—and to really own your voice.

MAKING OUR MARK

At Brizo®, we are committed to being good citizens of the community, which means we are dedicated to making our purpose not just about the products we make—but rather, the mark we make on the world.

It's this belief that unites Brizo with St. Jude Children's Research Hospital®.

Since St. Jude opened its doors in 1962, childhood cancer survival rates have increased from less than 20% to around 80% and climbing. In fact, within the next decade, St. Jude hopes to raise its survival rates even higher—to nearly 90%.

St. Jude is the only pediatric cancer research center where families never have to worry about paying for treatment. One of the ways the hospital is able to provide such outstanding care for its patients is by hosting annual fundraisers like the St. Jude *Dream Home Giveaway*.

Every year, the St. Jude *Dream Home Giveaway* gives thousands of people the opportunity to

win a beautiful, brand new home by entering an exclusive raffle. Afterwards, the money raised helps fund research and treatment efforts for St. Jude. Since 2010, Brizo has been a national sponsor of the St. Jude *Dream Home Giveaway*, donating more than \$1.7 million in products and donations.

And, in 2012, the employees of the company's factory in Jackson, Tennessee, found a way to give even more.

The mission of St. Jude "hit close to home" for a number of employees at the Jackson plant according to Toni Alexander, human resources manager of the Jackson facility.

Over a two-week period, employees at the Jackson plant hosted and participated in a variety of activities to benefit St. Jude, including independent fundraising, product raffles and unique incentive programs, where based on contribution levels, an employee could throw a pie in a manager's face, swap jobs for a day or even earn some extra vacation time.

The two-week-long effort culminated in a 5K dash for the children of St. Jude and ultimately helped the Jackson plant employees raise a grand total of \$17,000.

"The group of volunteers who made up our steering committee oversaw all the fundraising efforts and found some creative ways to make charitable giving fun," said Alexander. "In the end, more than 700 of our employees participated and raised a staggering amount of money."

RESTAURANT 101

WE ASKED CHEF JAMIE BISSONNETTE TO GIVE US HIS THOUGHTS ON OPENING A RESTAURANT, CALLING THE SHOTS AND KNOWING GOOD DESIGN WHEN YOU SEE IT.

About two years ago, Ken Oringer and I were working on opening a new restaurant in Boston. We were looking at a couple spots when one backed out at the last minute. After that, we came very close to signing on another place, but first we went down to NYC for a day. There, we were introduced to Doug Jacob (one of our new business partners).

Doug walked us through the space [that is now Toro in New York], and something about it just said Toro. We got this feeling, and we took a walk, and we headed across the street to Chelsea Market—which is when we decided then and there that we were going to open our new business in New York.

Once we settled on a location we knew we had to start thinking about design. So we looked at all the raw stuff in the space—the industrial pillars, the concrete floor, and we realized we wanted to enhance rather than remove those elements. The more we pulled away what was there, the more we decided we'd like to keep it raw. We kept going back to Toro Boston as a reference, because we wanted to capture the same spirit. All it took was knocking the dust off, polishing a few pieces of marble and the place was already coming together.

Because we kept the overall space so raw, we took time to figure out where we wanted to add special touches to make the place a little more unique. Each element was definitely a group decision. We knew we didn't want to cover any of our brick walls, so we said, "where there was a big empty wall—let's throw up a chalkboard like we have in Toro Boston." We also knew we loved the ceilings as they were. They're beautiful.

Each decision we made felt important individually, and it's easy to get wrapped up in the details, but in the end each piece is all part of one big puzzle. One of my favorite design elements is the elevated space in the back where the Plancha bar is. You can really see and feel the energy of the space. It's also a great spot for "private" parties, because it allows you to still be part of the restaurant while being a bit removed and elevated from the main dining room. The living wall doesn't hurt either.

We did run into some problems along the way though. A lot of things that were originally in that design were chosen for form not function. So, when we started to really look at the flow of service, food coming up from the kitchen and the flow of the entry and bar, we had to make some changes. We reached a certain point where we had to say, just because it's pretty, doesn't mean it makes sense for the space. That said, we always kept our aesthetic goals in the back of our minds.

PHOTOGRAPHY: NOAH FECKS

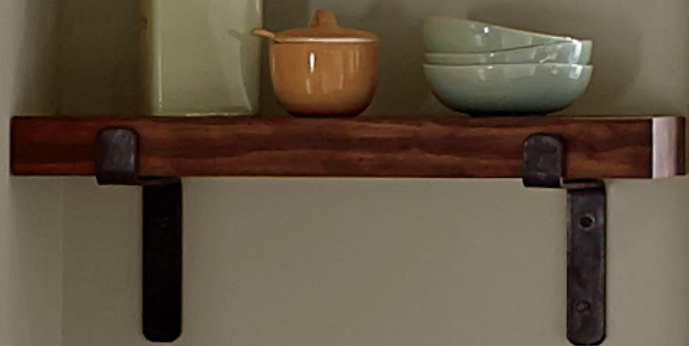

JAMIE BISSONNETTE IS CHEF AND OWNER OF COPPA IN BOSTON AND TORO IN BOSTON AND NEW YORK. HE IS ALSO THE 2014 JAMES BEARD AWARD WINNER FOR "BEST CHEF: NORTHEAST."

coppaboston.com / toro-restaurant.com

Toro New York opened its 120-seat Chelsea location in September of 2013 to rave reviews. The menu boasts an eclectic range of traditional and modern tapas and focuses on local, market-fresh food.

ARTESSO™

NEW

FORGED. REFINED.
REMARKABLE.

An industrial revolution.

The artisan tradition has never been more alluring. Tracing its visual inspiration to factories of the early 20th century, the Artesso kitchen collection by Brizo® is a warmer, more refined take on the industrial aesthetic. An array of innovations, including MagneDock® Technology and optional SmartTouch® Technology, make the Artesso collection's functionality every bit the equal of its form.

BATH

BALIZA[®]

INSPIRED. STATELY.
ILLUMINATING.

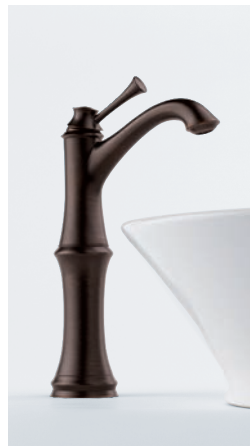

A beacon for the bath.

Drawing inspiration from the timeless beauty of lighthouses, the Baliza bath collection by Brizo[®] features a unique architecture and simple, elegant lines. The result is a stunningly fresh perspective on a warm, traditional feel.

CHARLOTTE®

OPULENT. POISED.
POETIC.

Artful indulgence.

The Charlotte bath collection by Brizo® infuses clean lines with classical elegance, deftly bridging the gap between traditional and modern design. The first collection available with our new Cocoa Bronze finish, the single-hole electronic lavatory features SmartTouchPlus™ Technology (allowing hands-free and touch activation), as well as TempIQ™, Brizo's new temperature control technology. The Charlotte collection's bold symmetry and sumptuous details add an instant sophistication to any bath.

LOKI®

CLEAN. CONTEMPORARY.
CALCULATED.

A brilliant deception.

Inspired by Scandinavian design, the Loki bath collection centers around an ingenious faucet* that pairs a graceful arc with a horizontal platform that resulted in a RedDot award for product design. The unique sliding handle system invites the user to engage with it to manipulate water volume and temperature.

**Designed by Torben Jorgensen/Gneiss Group & Mikal Harrsen*

QUIESSENCE®

MINIMAL. HUSHED.
HYPNOTIC.

Strong and silent.

The minimalist style of the Quiessence bath collection by Brizo® brings retro European design to America. It borrows a design philosophy from the 1950s and applies it to the technology found today. Two simple, perpendicular lines intersect, creating a bold statement that is accented by handle materials including metal, Maple or Wenge wood.

SOTRIA™ NEW

UNIQUE. STREAMLINED.
SUBLIME.

A new kind of jet set.

Encapsulated in the silhouette of the striking Sotria bath collection by Brizo® is a myriad of influences: airplanes, automobile tail fins and the optimism of mid-century America. Its triangular spout architecture is echoed across a range of configurations and complemented by signature features, including closed and channel spout lavatory faucets, a freestanding tub filler, and a multi-function showerhead with exclusive H₂Okinetic® Technology.

TRESA®

ELEGANT. MODERN.
ENDURING.

Bridging past and present.

The Tresa bath collection by Brizo® reunites us with the past by taking design elements from the earliest of European fountains. A simple bend in the neck and traditional styling provide the classic feel of these graceful structures.

SECURE.

Luxury, without limits.

The bath is an individual space designed to meet different styles and needs—and Decorative Grab Bars by Brizo® are made to do the same. Available in traditional and contemporary styles, these decorative grab bars coordinate with Brizo bath suites and are available in a range of finishes and sizes to complement any décor. They are also ADA-compliant, supporting twice the requirement of the Americans with Disabilities Act—up to 500 pounds (226 kg) of force when properly installed—to provide stabilizing security without sacrificing on style. Ultimately, Decorative Grab Bars by Brizo are proof that beautiful design is universal.

FEATURES:

THE NEW SPA OASIS

All too often, the “bath” in bathroom is ignored or forgotten. Now a newfound emphasis on personal luxury—along with Brizo® fittings—is changing that.

It's been a long, exhausting day.

Work was a nightmare of wall-to-wall meetings and barely made deadlines. Lunch? That was strictly theoretical. And that's to say nothing of the call from your mechanic (not good news) and your client meeting in the afternoon (not good news, either).

But for now, at least, none of that matters. You draw a bath, slip into the tub, and slip away to an entirely different world. Time slows down. Whatever stress you were feeling vanishes. And for an indulgent, restorative hour, you're not in your home—you're in your own private retreat.

If you're looking to explain the growing popularity of the personal spa oasis—a relaxing, spa-like experience in your own bathroom—the above vignette is a good place to start. “We live in a country that is ‘on’ all the time,” says Erica Islas, a Los Angeles-based interior designer, and Brizo Blogger 19 alumnus. “It's not like other places in the world where it's customary to take siestas.

“So we look forward to treating ourselves with a nice place to relax and unwind at the end of the day or on weekends or during our morning bathing ritual. We look forward to an oasis to call our own.”

And tub fillers, Islas says, are a crucial part of creating that space—particularly as the look of tub fillers has become more modern. “Tub fillers were always more traditional and went with claw-style baths or exposed plumbing fixtures. Again, more traditional. Then the modern freestanding tubs became more popular and started trending—and I quickly saw Brizo fill that niche with modern tub fillers.”

And where does Islas see the tub filler trend going? In a word, technology. “I love designing bathrooms with new products and incorporating new technology that saves water to create a luxurious bathing experience.”

CREATING YOURS

When asked what advice she has for those looking to bring their own personal spa oasis to life, Islas doesn't hesitate. “It's important to ask, ‘What is a spa oasis to me?’ We all have a different definition; some people consider a spa something tropical, while others think of a Japanese bath,” she says.

Picking out the right fitting, not surprisingly, is also important. “It's the icing on the cake, the jewelry of the bath. You have to research your options and know what kind of mood you want to create.”

But whatever choices you make in designing your own spa oasis, “tub fillers in general can change your whole bathing experience,” Islas says.

“Everyone wants a home spa retreat. We all work so hard and want to treat and pamper ourselves. The tub filler trend is influenced by the need and desire for what's new and unique. People want to feel pampered.”

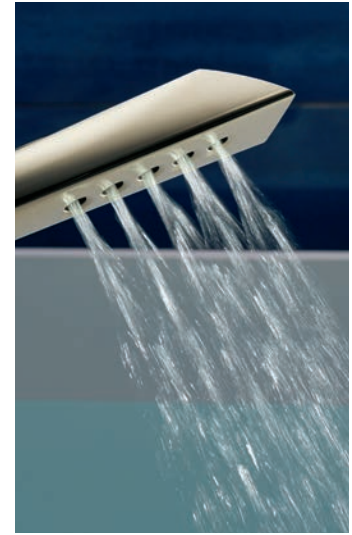

An aerial night view of a city with numerous illuminated buildings. The lights from the windows and streetlights create a warm, golden glow against the dark sky. The buildings are densely packed, and the perspective is from a high angle, looking down on the city.

TUB FILLERS

With clean lines and minimal ornamentation, single-handle freestanding tub fillers by Brizo® effortlessly evoke a contemporary design aesthetic—bringing stunning new life to a modern or transitional bath space. Beyond simply making a statement, this collection of freestanding tub fillers incorporates a wealth of innovative features, including an indexing handshower to ensure drips land in the tub instead of on the floor, as well as H₂Okinetic® handshowers (on select models) to provide an indulgent experience while using less water. The patent-pending floor mount rough increases faucet stability, simplifies installation and allows for a constant spout height to the finished floor. And the high flow rate on all models allows you to fill the tub more efficiently—and escape to your private retreat even faster.

**TRIM****ROUGH**

ORDERING SINGLE-HANDLE MODELS

With several unique architectures available, the hardest part of creating your perfect bath with a Brizo freestanding tub filler may be choosing which design you like best. Fortunately, the rough can be ordered separately and installed before you have to decide. This also minimizes the risk that the trim will be damaged or misplaced during construction.

Jason Wu For Brizo™

T70175

Available in: BL

Height: 40 1/2"
Reach: 8 7/8"

Flow rate:

7.6 L/min @ 550 kPa

Classic and timeless, the two-handle design pairs traditional styling with an array of configurations and trim kit options, allowing you to create a look that matches virtually any space. Separate trim kits include the handshower, spout and handles and are designed to coordinate with a variety of Brizo® bath collections, while floor mount, deck mount and wall mount installation options offer an added degree of flexibility. The patent-pending floor mount rough increases faucet stability, simplifies installation and allows for constant spout height to the finished floor. The rotating handshower cradle ensures drips go into the tub—not on the floor—and the stretchable finished metal handshower hose offers a beguiling combination of beauty and functionality.

ORDERING TWO-HANDLE MODELS

Brizo two-handle freestanding tub fillers offer exceptional flexibility, with separate trim kits and installation components providing an array of options to fit any space. To create a complete model, simply order the body assembly in your desired finish, select the trim kit (which includes handshower, spout and handles), and then add the appropriate floor mount, deck mount or wall mount risers/unions. For floor mount installations, a rough is also required.

NEW

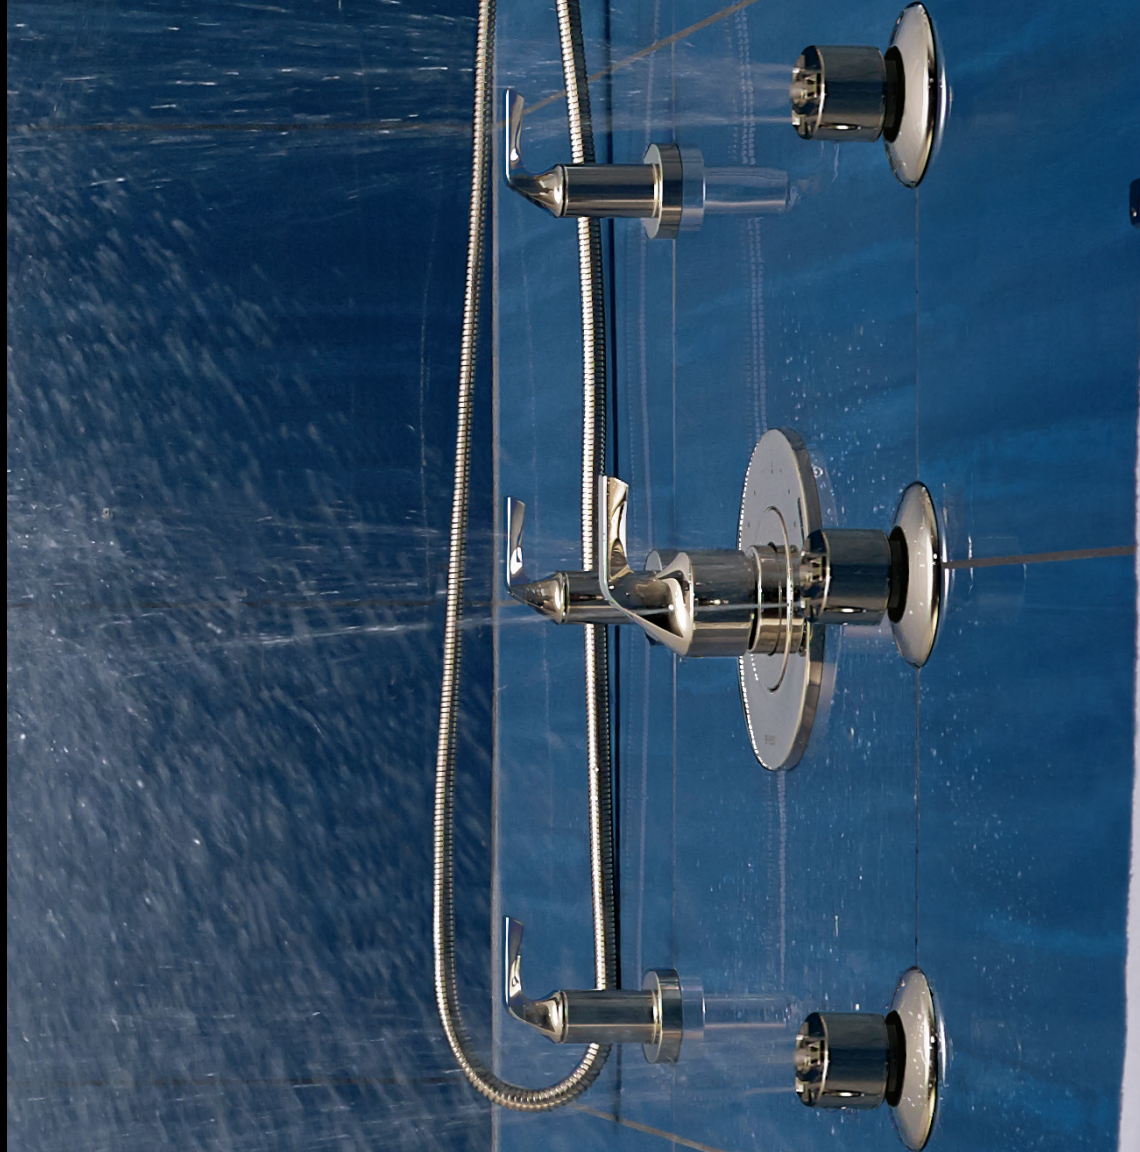

HYDRACHOICE™ MAX BODY SPRAYS

Customization is a luxury that people have been chasing since the dawn of time. We like to put our stamp on things. And claim them as our own.

We also like the symmetry, comfort and pleasure that comes with the perfect fit. We tailor our pants, we hem our dresses and we personalize everything from the shoes we wear to the mattresses we sleep on.

And now, with its clean lines and flush mount design, the new HydraChoice™ Max Body Spray System has the power to customize your shower. Its spray heads extend automatically when water is turned on and can be adjusted 50 degrees in any direction—allowing you to aim the water exactly where you want it. The system also offers a choice of four interchangeable spray heads with H₂Okinetic® Technology or Touch-Clean® spray holes that come with Invigorating, Soothing, Massaging and Full Spray options.

With the new HydraChoice™ Max Body Spray System your shower transforms from being just another part of the morning routine, to a personal sanctuary, unique to only you.
